LumenART

MODERN LUMEN ART

Company Profile

Modern Lumen Art Trading Establishment (LUMENART) was founded in 2016 in response to economic development and market's needs in standard and modern lighting, lighting control systems and energy saving management and technology.

LUMENART started by supplying simple and ordinary lighting fixtures, poles and lamps from local and international manufactures focusing on private market sector clients, including commercial buildings, offices and small villas. Faster than other similar organizations **LUMENART** had grown by serving new important and prestigious clients and providing latest and optimum lighting, lighting systems and energy saving solutions.

Our assets are our expert and professional staff, fast and affordable services and effective sales and expediting team.

Supply Range:

Standard, High Technology Lighting Fixtures from international and local manufactures, Lighting Poles, Decorative Lighting Poles and Brackets, Lighting Accessories, Cold Cathode Lighting, LED Lighting, Emergency and Exit Lighting, Central Battery System, Lighting Control System for outdoor and indoor applications, Task Lighting, Explosion Proof and Classified Lighting Fixtures, Switches and Junction Boxes.

In addition to above **LUMENART** has its own Islamic, Custom-Made Lighting Fixtures, Solar Systems, Control & Diming Systems.

Services:

LUMENART services starts before selling products by providing design and engineering studies, site surveys, lighting calculations and simulations, effective energy saving studies and cost-effective lighting solutions.

Our complete efficient solutions depending on combining latest available lighting products along with smart control systems –if required–, to meet our client's expectations.

Complete Lighting Design with Neutral Specifications:

- Concept Design: which includes; summary of project requirements, design approach and other factors relevant to the lighting design. Then prepares a Lighting Concept Report supported by sketches, diagrams and illustrations to convey the lighting design intent and strategies.
- Preliminary Design: which includes preliminary lighting layouts on plans or elevations, preliminary schedules indicating the type of luminaires and lamps,

preliminary details of critical areas to confirm feasibility of the installation and lighting calculations to check compliance with standards.

- **Lighting Specification:** which includes finalization of the complete lighting package, lighting layouts and lighting specifications. said stage will generate BOQs, load schedules & products vendors and may extended (upon request) to evaluate bidders/suppliers offers.
- **Supervision & Commissioning:** To ensure that the installation of the lighting solution is as per planned. Then to generate a final report.

Complete Lighting Design with selected Manufacturer's Products Specifications:

- **Concept Design:** which reflect the manufacturer thoughts, suggestions & design approach for selected Areas.
- **Preliminary Design:** which includes preliminary lighting layouts on plans or elevations, preliminary schedules indicating the type of luminaires and lamps from designer/manufacturers products and lighting calculations to check compliance with standards. (For selected Areas).
- **Lighting Specification:** which includes lighting layouts and lighting specifications, BOQs, load schedules and commercial lighting offer for selected Areas.

LUMENART implement the strategy which considers that our customer's requirements and benefits come first.

Quality:

LUMENART over twenty years experienced team assures to provide lighting and energy solutions and its components from manufacturers meet our client's quality requirements and expectations.

LUMENART provides warranty certificates from manufacturers as per their standard and customized warranty terms and conditions.
